P: 925-639-3049 jonnatano94@gmail.com www.amazingstudent.com [LinkedIn](#) [GitHub](#)

SKILLS Ruby, Ruby on Rails, RSpec, JavaScript, jQuery, React, Redux, SQL, Git, HTML5, CSS3, Node.js, Python, Express

PROJECTS

Rent-A-Vehicle | (*JavaScript, React/Redux, Node.js, Express, Passport, Google API, API, CSS3*)

[live](#) | [github](#)

- Utilized Node.js Passport authentication strategies for encrypted JSON Web Token requests allowing for signed in user identification rather than generating cookies to store the user in session.
- Integrated Google Maps API with React Geocoder to enable post location visualization allowing users to easily find nearby vehicles available for rent.
- Enabled user image uploading with post creation by incorporating Cloudinary heavy-duty image and video platform API for instant cloud storage and accessibility.

365px | (*JavaScript, React/Redux, Rails 5, AWS S3, PostgreSQL, Webpack, CSS3, HTML5*)

[live](#) | [github](#)

- Incorporated MVC architecture with Polymorphic model associations, reducing the number of required tables while increasing the ease of data flow from end-to-end.
- Implemented BCrypt hash generated built in salt strategy allowing for secure user and data authentication while at the same time preventing rainbow attacks.
- Assimilated photo integration and display with AWS and Active Storage, facilitating the creation of photo objects whose data required persistent storage to the database, flowing from React drag and drop Dropzone component.

JasteroidS | (*Javascript, Howler.js, HTML5, CSS3, NPM*)

[live](#) | [github](#)

- Developed collision detection algorithm for spaceship object based on canvas location and relative position to asteroid objects.
- Integrated Keystroke event listeners through the use of keycode dependency in order to properly handle and predict player direction and movement.
- Utilized Howler.js in order to assimilate spaceship sound feature as well as background audio for the duration of the game.

EXPERIENCE

Claims and Data Analyst

New Frontier Group

July 2016 - October 2018

- Oversaw management and maintenance of company's database through consistent accuracy report regulation followed by management review and advising. Resulting in easy access organized patient and provider information for all internal departments.
- Determined strategic path for high volume of medical claims within current turnaround standards allowing seamless end-to-end service delivery.
- Monitored overseas client's portfolio of 30 million dollars while identifying and reporting investment and expense trends leading to an increase in medical claims savings of 20%.

Research and Data Entry/Analysis Associate Intern

Air Commercial Real Estate Association

August 2015 – March 2016

- Managed CDX database system allowing for accessible real estate data provided to all departments, leading to accurate, efficient reporting and increase in productivity by 25%.
- Researched market trends and accurately reported to 7 major account holders and research department head on market targeting and advertising strategies that allowed company to hold wider market range and growth of 17%.

EDUCATION

University Name - BA Business Economics and minor in Management

September 2012 - June 2017

Curriculum Highlights: Econometrics, Boolean logic, Discrete Data Structures and Mathematics for computer science, Linear Algebra and Python Programming and Libraries.

App Academy - Full-Stack Software development Program

October 2018 - January 2019

Rigorous 1000-hour software development course with <3% acceptance rate focusing on Rails, SQL, JS, React, TDD, algorithms, design patterns, and programming best practices.
